**RT-Systemtechnik GmbH**

## The RT-Systemtechnik GmbH

For about two decades, RT-Systemtechnik GmbH has been one of the established electronics OEM (original equipment manufacturer) in the construction machinery and agricultural sector. Our focus is the development and production of ECUs, HMIs and controllable video systems for applications in automotive electronics. We are OEM supplier from the idea to the series.

### Our product groups:

- Automotive electronics
- Camera technology and image processing
- Electronic engine control units
- Control and operating devices
- Safety solutions for vehicles

### Our services:

- Development of hardware and software
- FPGA design
- standards management
- International contract manufacturing with quality management

# Best Chances

## Again and again, „our“ trainees are the best of their year

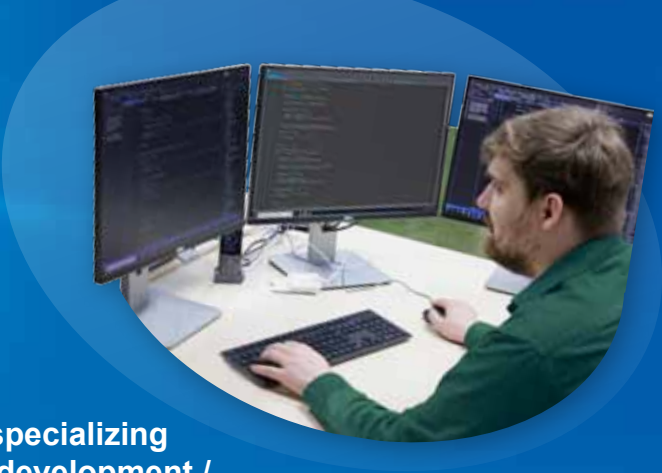

In Rheine, in the heart of the Nordmünsterland, there are the headquarters of RT-Systemtechnik GmbH. In a working environment with state-of-the-art standards and excellent in-house support opportunities, there is nothing to prevent the individual development of our trainees.

Again and again „our“ trainees belong to the best of her vintage and received awards of the IHK Nord Westfalen for their outstanding achievements.

We are happy to welcome in our team every year young, motivated talents. They have the chance to get a qualified and future-oriented apprenticeship.

## We train

### **IT Specialist (specializing in application development / programming) (m/w/d)**

IT specialists working in the field of application development, expects a professional life without routine. Every day and every order is different. Often new solutions have to be found. To ensure this, they are familiar with databases and have a deep understanding of operating systems.

Because programming languages used and operating systems are constantly evolving, they always must be up to date with the latest technical developments. Only then they can creatively develop new ideas together with their colleagues. Because they are not lone fighters, but team players who work together to develop and implement customer-specific solutions.

Favored education: technical college / university

*Creating test software*

*Software test on devices*

## **Electronics engineer for devices and systems (m/w/d)**

Electronics engineers for devices and systems manufacture electronic devices of our portfolio. They control and monitor all processes in the production of assemblies. They install and configure software or operating systems, inspect components, and conduct end-of-line testing. In addition, they create production documents, judge production machines or test setups and are thus the most active part of production and the direct contact for quality management.

Electronics engineers for devices and systems support technicians and engineers in the implementation of new developments up to series production. The job description covers different areas such as development-accompanying activities, series production, failure analysis / repair and customer service.

Favored education: high school / technical school

*Test set-up*

*equipment installation*

## We train

### Industrial business management assistant (m/w/d)

Industrial business management assistants control business processes in the company. In sales, they develop offers and communicate with the customer.

In purchasing, they determine the demand, negotiate with suppliers and conclude contracts. They develop strategies in the field PR / Marketing and implement them. In production they are responsible for the best possible production processes.

Industrial business management assistants will be for everyone tasks in the commercial area second hand. Because they cooperate with customers as well as with suppliers, employees and the communicating management, they are considered important cutting and switching point in the company.

Favored education: technical college / commercial college

*In the customer talk*

*Order processing*

## **Specialist for warehouse logistics (m/w/d)**

Specialists for warehouse logistics accept goods of all kinds and check the quantity and quality from the accompanying documents. They organize the unloading of goods, sort them and store them properly at the designated bins. They ensure optimal storage conditions and regulate for example temperature and humidity. The material flow they provide using various loading aids, such as forklift or pallet truck, safe.

In cooperation with the order processing they combine deliveries, pack the goods and ensure collection by external shipping service providers. In the case of the outgoing freight, they are responsible for securing the load. In addition, they pick the entire materials needed for the in-house production process.

Favored education: high school

*Storage in the high bay*

*ware-picking*

# Internship at any time!

## Just have a look...?!

The student internship is an important experience, so that the future career choice is not a wrong decision.

RT-Systemtechnik GmbH offers students the opportunity in one internship training apprenticeships and first impressions to gain the world of employment. As interns they can find out which ones skills and abilities in the respective apprenticeships are in demand and whether these lie to them.

**In all of our training occupations, we offer places for a student internship.**

We also offer interested students and trainees to do an internship with us.

*In the commercial area*

*In the production*

# After apprenticeship

## ... a view in the future

Following a successful vocational training we offer a variety of possibilities, for example

- **In-service training**
- **Technician, master, business economist, specialist**
- **Bachelor-/ Master-Thesis**

*RT training with presentation, moderation & problem solving*
