experience

With more than 25 years of experience in hardware and software development **RT-Systemtechnik GmbH** is one of the leading electronics OEMs in the Vehicle and special vehicle construction as well as in the agricultural and construction machinery sector. Our core competence is the development and series production of operating and control devices as well as camera systems.

We are hiring: (m/f/d)

Hardware developer communication systems

Your tasks

- Designing and creating hardware modules for vehicle networking with a focus on Ethernet switches and wireless modules
- You are responsible for the holistic implementation of requirements, module design, integration, verification and validation
- They accompany your development from prototype to series production as part of the project team

Your profile

- Completed studies in the field of electronics, communications engineering or a comparable qualification
- Design knowledge of network components, networked controllers and wireless modules
- Experience in dealing with EMC requirements and EMC-compliant circuit board design
- Ideally you already work with Altium or Eagle
- Broad technical understanding
- Recognition of problems and their independent solution-oriented processing
- Communication in English is easy to you
- Communication skills, teamwork and personal initiative complete your profile

If we have aroused your interest, please send your comprehensive application by email as PDF file to: karriere@rt-systemtechnik.de
