technology
experience

With more than 25 years of experience in hardware and software development **RT-Systemtechnik GmbH** is one of the leading electronics OEMs in the Vehicle and special vehicle construction as well as in the agricultural and construction machinery sector. Our core competence is the development and series production of operating and control devices as well as camera systems.

We are hiring: (m/f/d)

Hardware developer mobile/vehicles electronics

Your tasks

- Design/creation of digital and analog electronic circuits or embedded systems with focus on power supply, microcontroller technology and display control
- Integration of interfaces for external sensors / actuators
- You are responsible for the holistic implementation of requirements, module design, integration, verification and validation
- They accompany your development from prototype to series production as part of the project team

Your profile

- Completed studies in the field of electronics, communications engineering or a comparable qualification
- You have experience in analogue and digital circuit technology, circuit simulation and measurement technology
- Ideally you already work with Altium or Eagle
- Broad technical understanding
- Recognition of problems and their independent and solution-oriented processing
- Communication in English is easy to you
- Communication skills, teamwork and personal initiative complete your profile

If we have aroused your interest, please send your comprehensive application by email as PDF file to: karriere@rt-systemtechnik.de
