With more than 25 years of experience in hardware and software development **RT-Systemtechnik GmbH** is one of the leading electronics OEMs in the vehicle and special vehicle construction as well as in the agricultural and construction machinery sector. Our core competence is the development and series production of operating and control devices as well as camera systems. Shape the future of the agricultural and construction machinery industry with us and become part of our team.

## We are hiring:

# Embedded software developer

**(m/f/d)**

### Your tasks:

- Software programming for mobile applications on control and operator panels
- Planning, specification and implementation of system requirements
- With tools for testing and static and dynamic code analysis, you ensure high-quality work.

### Your skills:

- Completed degree in a relevant field, e.g., computer science, electrical engineering, or a comparable qualification
- Hardware knowledge of 32-bit microcontrollers such as the ARM Cortex-M series
- Knowledge of vehicle communication systems such as CAN, LIN, or Ethernet
- Broad technical understanding and sound programming skills in C & C++
- Ability to identify problems and work independently and in a solution-oriented manner
- Communicating in English is easy for you
- Strong communication skills, teamwork and initiative round out your profile

### What awaits you:

- Family-run company with a positive work environment
- Independent, diverse, and responsible work in a future-proof and rapidly growing industry
- Personal and professional development opportunities
- A modern and bright work environment
- Flexible working hours
- Attractive benefits, from complimentary beverages to, e.g., a „businessBike" and „Edenred" memberships
