technology
experience

With more than 25 years of experience in hardware and software development **RT-Systemtechnik GmbH** is one of the leading electronics OEMs in the vehicle and special vehicle construction as well as in the agricultural and construction machinery sector. Our core competence is the development and series production of operating and control devices as well as camera systems. Shape the future of the agricultural and construction machinery industry with us and become part of our team.

We are hiring:

Hardware developer (m/f/d)

Mobile / vehicles electronics

Your tasks:

- Design and creation of digital and analog electronic circuits or embedded systems with a focus on power supply, microcontroller technology and display control
- Integration of interfaces for external sensors / actuators
- You are responsible for the holistic implementation of requirements, module design, integration, verification and validation
- You accompany the development from prototype to series production as part of the project team

Your skills:

- A degree in electronics, communications engineering or a comparable qualification
- You have a broad technical understanding, experience in analog / digital circuit technology, circuit simulation and measurement technology
- Ideally, you already work with Altium or Eagle
- You recognize problems and can work on them independently and in a solution-oriented manner
- It is easy for you to communicate in English
- Strong communication skills, ability to work in teams & initiative round off your profile

What awaits you:

- Family-run company with a positive work environment
- Independent, diverse, and responsible work in a future-proof
- and rapidly growing industry
- Personal and professional development opportunities
- A modern and bright work environment
- Flexible working hours
- Attractive benefits, from complimentary beverages to, e.g., a „business bike“ and „Edenred“ Membership

Is this position a good fit to you?
We look forward to receiving your
